

Dear Parents,

Please find attached a copy of our latest inspection report. This is a compliance inspection which looks at a number of things from a policy and procedural point of view. The report is bland in tone (all are the same) and does not focus on educational quality or other things which we know to be strengths of the school. There are a few largely administrative errors which we have already put right and which nothing to be unduly concerned about. If you wish to know more detail of either the noted failings or the actions taken to remedy, please contact me at school.
