

Sixth Form Vision

When students reach Year 11 and consider their post-16 options, they can experience a mixture of feelings - from sadness that they are in their final year of senior school to excitement about moving on and being able to explore their futures.

The introduction of Hollygirt Sixth Form provides the solution. It allows students to continue to meet their potential in the valued community in which they feel secure, whilst providing the sixth form experience of independence and opportunities to grow and develop. The Sixth Form will continue the school's safe and caring environment so that students are able to thrive in a supportive community, both academically and personally.

A core value is that students will benefit from being at the heart of the sixth form, rather than being one of many. We will be able to deliver excellence in their education whilst keeping the students' best interests at the core of all we do. Bespoke study and enrichment programmes provide tailored packages to suit their interests and needs and will be built on the closely interconnected fundamentals of cognitive science into how we learn and a focus on student wellbeing, with 'test anxiety' research-informed strategies.

A successful student is underpinned by five key elements and Hollygirt Sixth Form will provide a VESPA framework for students to grow and develop. Having a vision for your future direction, knowing the importance of the effort that is needed, having effective systems in place to manage a sixth form timetable, utilising the science of learning so that practice and recall is efficient and effective, and finally having a positive attitude to learning, using feedback as opportunities to grow.

Sixth formers will be an integral part of the Hollygirt and wider community. They will grow into future-ready young adults, through developing their skills and confidence. Clear and personalised guidance for higher education and career paths will allow all to make informed choices. Our vision for our students is that they will be equipped with the qualifications and mindset to shape their futures. As valued and valuable members of our society, they will become the best candidates in their chosen fields.
